SVENSKA GEOFYSISKA FÖRENINGEN

Tellus

A BI-MONTHLY JOURNAL OF GEOPHYSICS

Volume 26 · 1974

U. I. C. C.
FEB 5 1975
LIBRARY

Printed in Sweden by

Almqvist & Wiksell, Uppsala 1974

Editor
B. BOLIN
Stockholm
Sweden

Executive Editor
P. KÅLLBERG
Stockholm
Sweden

Office of the Editor: Arrheniuslaboratoriet, Fack, S-104 05 Stockholm

Contents

Volume 26, 1974

NUMBER 1–2

C. E. Junge: Introduction 1

J. E. Lovelock and L. Margulis: Atmospheric homeostasis by and for the biosphere: The gaia hypothesis 2

H. G. Schlegel: Production, modification and consumption of atmospheric trace gases by microorganisms 11

W. S. Broecker and T. H. Peng: Gas exchange rates between air and sea 21

W. Klug: Eddy viscosity profile in the upper oceanic layers derived from radon measurements 36

P. Warneck: On the role of OH and HO_2 radicals in the troposphere 39

P. J. Crutzen: Photochemical reactions initiated by and influencing ozone in the troposphere 47

D. H. Ehhalt: The atmospheric cycle of methane 58

R. A. Lamontagne, J. W. Swinnerton and V. J. Linnenbom: C_1–C_4 hydrocarbons in the North and South Pacific 71

U. Schmidt: Molecular hydrogen in the atmosphere 78

H. G. Östlund and A. S. Mason: Atmospheric HT and HTO: I. Experimental procedures and tropospheric data 1968–72 91

R. E. Newell, G. J. Boer and J. W. Kidson: An estimate of the interhemispheric transfer of carbon monoxide from tropical general circulation data 103

B. Weinstock and T. Y. Chang: The global balance of carbon monoxide 108

W. Seiler: The cycle of atmospheric CO 116

J. W. Swinnerton and R. A. Lamontagne: Carbon monoxide in the South Pacific Ocean 136

R. W. Meadows and D. J. Spedding: The solubility of very low concentrations of carbon monoxide in aqueous solution 143

R. B. Ingersoll, R. E. Inman and W. R. Fisher: Soil's potential as a sink for atmospheric carbon monoxide 151

J. Hahn: The North Atlantic Ocean as a source of atmospheric N_2O 160

H. Moore: Isotope measurement of atmospheric nitrogen compounds 169

S. H. Nash: Nitrous acid in the atmosphere and laboratory experiments on its photolysis 175

H. W. Georgii and W. J. Müller: On the distribution of ammonia in the middle and lower troposphere 180

B. Bolin, G. Aspling and C. Persson: Residence time of sulfur in the atmosphere as dependent on height of emission, intensity of turbulent transfer and efficiency of sink mechanisms 185

D. M. Whelpdale and R. W. Shaw: Sulphur dioxide removal by turbulent transfer over grass, snow and water surfaces 196

D. Jost: Aerological studies on the atmospheric sulfur budget 206

H. Nielsen: Isotopic composition of the major contributors to atmospheric sulfur 213

A. W. Castleman, Jr., H. R. Munkelwitz and B. Manowitz: Isotopic studies of the sulfur component of the stratospheric aerosol layer 222

R. A. Cox: Particle formation from homogeneous reactions of sulphur dioxide and nitrogen dioxide 235

N. B. Cuong, B. Bonsang and G. Lambert: The atmospheric concentration of sulfur dioxide and sulfate aerosols over Antarctic, Subantarctic, areas and oceans 241

J. P. Lodge, P. A. Machado, J. B. Pate, D. C. Sheesley and A. F. Wartburg: Atmospheric

trace chemistry in the American humid tropics 250

R. A. Rasmussen: Emission of biogenic hydrogen sulfide 254

W. L. F. Brinkman and U. de M. Santos: The emission of biogenic hydrogen sulfide from Amazonian floodplain lakes 261

S. Beilke and D. Lamb: On the absorption of SO_2 in ocean water 268

P. Brimblecombe and D. J. Spedding: The absorption of low concentrations of sulphur dioxide into aqueous solutions 272

J. M. Hales, J. O. Wilkes and J. L. York: Some recent measurements of H_2S oxidation rates and their implication to atmospheric chemistry 277

S. A. Penkett and J. A. Garland: Oxidation of sulphur dioxide in artificial fogs by ozone 284

E. McLaren, A. J. Yencha, J. M. Kushnir and V. A. Mohnen: Some new thermal data and interpretations for the system SO_2–NH_3–H_2O–O_2 291

D. Stauffer and C. S. Kiang: Heteromolecular nucleation theory for multicomponent gas mixtures 295

NUMBER 3

C.-Y. Tsay and S. K. Kao: An analysis of wave structure near center of maximum turbulent kinetic energy 299

R. R. Long: Some experimental observations of upstream disturbances in a two-fluid system 313

P. G. Bellamy-Knights: An axisymmetric boundary layer solution for an unsteady vortex above a plane 318

A. Ebel: Heat and momentum sources of mean circulation at an altitude of 70 to 100 km 325

P. Morel and O. Talagrand: Dynamic approach to meterological data assimilation 334

R. J. Charlson, W. M. Porch, A. P. Waggoner and N. C. Ahlquist: Background aerosol light scattering characteristics: nephelometric observations at Mauna Loa Observatory compared with results at other remote locations 345

W. G. Zdunkowski and R. J. Junk: Solar radiative transfer in clouds using Eddington's approximation 361

M. J. Manton: The collection kernel for the coalescence of water droplets 369

A. Marenco and J. Fontan: Sur la production des ^{7}Be et ^{32}P dans l'air et l'utilisation de leur rapport d'activité 376

A. Marenco and J. Fontan: Etude des variations des ^{7}Be, ^{32}P, ^{90}Sr, ^{210}Pb et ^{210}Po dans la troposphère 386

E. Mészáros: On the spring maximum of the concentration of trace constituents in atmospheric precipitation 402

A. R. Bromfield: The deposition of sulphur in the rainwater in Northern Nigeria 408

Shorter Contribution

C.-Y. Tsay: A note on the methods of analyzing traveling waves 412

NUMBER 4

J. E. Hart: On the saturation amplitude for unstable baroclinic waves 417

L. Moen: A spectral model for investigation of amplifying baroclinic waves 424

S. W. Chi and J. Jih: Numerical modeling of the three-dimensional flows in the ground boundary layer of a maintained axisymmetrical vortex 444

P. E. Merilees: On estimation of truncation errors using the -3 law for kinetic energy 456

K. Saha: Some aspects of the Arabian Sea summer monsoon 464

C. E. Junge: Residence time and variability of tropospheric trace gases 477

M. J. Manton: On the dispersion of a developing droplet spectrum in a turbulent cloud 489

L. F. Bosart, T. J. Chen, R. E. Orville and H. P. Roesli: A preliminary study of the synoptic conditions associated with lightning flashes over Mt. San Salvatore, Lugano, Switzerland 495

B. Schäning and V. Scuka: Results of shipborne atmospheric radio noise measurements at 27 kHz on the North Atlantic during winter 506

Shorter Contribution

R. H. Hooverman: An empirical relation between the angular momentum content of the hemispheres and the flux across the equator 511

NUMBER 5

V. P. Starr: Some kinematic and dynamic properties of the atmosphere 513

E. Kessler: Model of precipitation and vertical air currents 519

Y. J. Lin and H. J. Hwang: Some effects of the moisture distribution in the subcloud layer on the thermal structure of a mature severe thunderstorm 543

R. E. Peterson: A model of the low-level jet with variable eddy viscosity 560

C. M. Tchen: Gravity turbulence connected with interfaces 565

S. C. Mehrotra: An alternative formulation of the problem of density jump 579

S. Bodin: The use of empirical orthogonal functions in quasigeostrophic numerical prediction models 582

L. B. Pedersen and L. P. Prahm: A method for numerical solution of the advection equation 594

J. D. Martin and J. P. Hackett: Tritium in atmospheric hydrogen 603

Shorter Contribution

C. W. Miller and W. V. Kessler: A new procedure for producing glass bubbling tips 609

Errata

W. S. Broecker and T. H. Peng: Gas exchange rates between air and sea 611

NUMBER 6

I. M. Held and M. J. Suarez: Simple albedo feedback models of the icecaps 613

E. Turkel: Frontal motion in the atmosphere 630

D. A. Salstein: Channel flow driven by a stationary thermal source 638

L. Debnath: On forced oscillations in a rotating fluid 652

M. J. Atkins: The objective analysis of relative humidity 663

U. Högström: A critical examination of the turbulence instrument used in the Marsta micro-meteorological field project 672

E. De Bary and G. Eschelbach: The ratio of primary scattering to total scattering of sky radiance 682

G. Major, I. Mersich and F. Miskolci: Sensitivity distribution along the strips of compensation pyrheliometers 691
